# Make a mosaic floor.

www.vanjufmarjan.nl - copyright 2024

1 person - 30 minutes.

The Romans adopted everything from the Greeks. Also the way they made tile floors. We call such a floor a 'mosaic'.

To find out why the Romans found those floors so special, make a mosaic yourself.

First you make a design, then you make the mosaic with small pieces of colored paper.

Requirements: Graph paper, glue, scissors and colored pieces of paper.

Cut out squares, diamonds and triangles from the different colored paper.

Stick this onto the graph paper in such a way that it makes a beautiful mosaic.
