

HEXAGON PUZZLE

ADDITION - 1 to 10

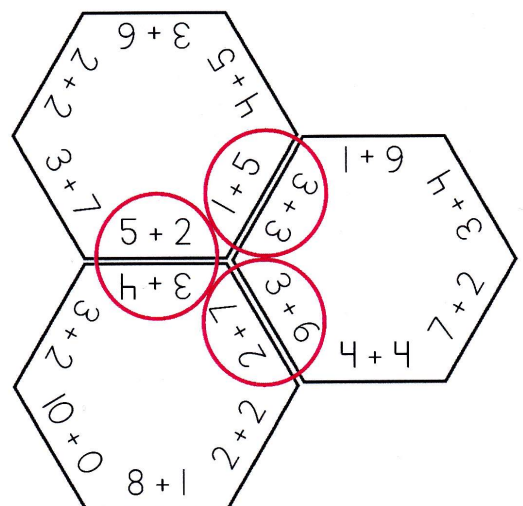

You can play this Hexagon puzzle alone, but you can also turn it into a game.

To play it you only need to print page 1 and page 2, with the hexagons, on somewhat thicker paper.

If you want to make several games, it is recommended to print them on colored paper, so each color is a separate game.

Then cut out all the hexagons.

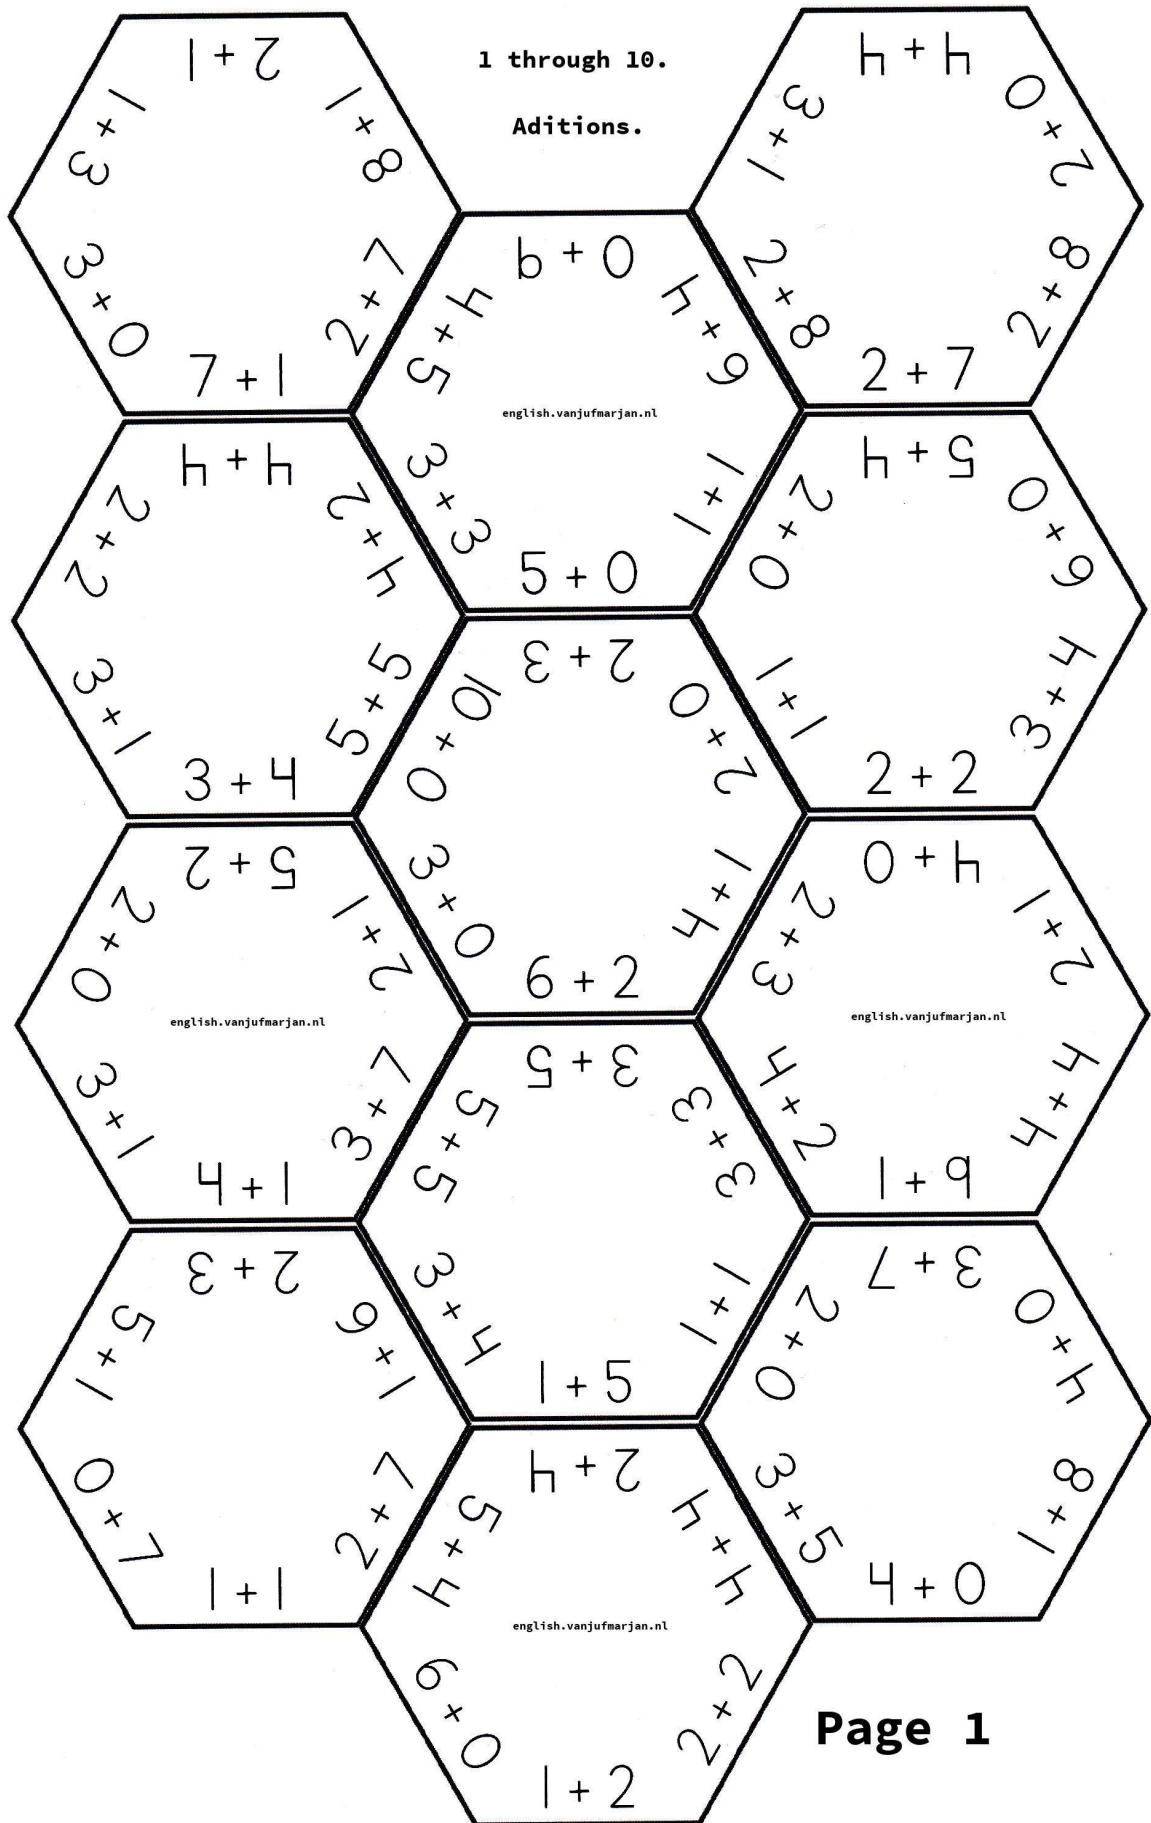

The aim of the game is that all puzzle pieces are placed on the table, whereby the outcome of the surfaces that touch each other match.
